### *Employment Trends in the Chemical Enterprise: Past, Present, and Future*

Thursday, February 24, 2011 – 2-3 p.m. EDT

[www.acswebinars.org/employment2011](http://www.acswebinars.org/employment2011)

How has employment in the chemical enterprise fared since the Great Recession began? Layoffs, restructuring, and unemployment are now the headline news to watch. The national unemployment rate has been stuck around 10% since 2009. Will it stay and what should we expect for the future? Hear from ACS and Bureau of Labor Statistics analysts as they describe recent trends in unemployment and provide projections about the future of employment in the chemical enterprise. Our speakers will also provide answers to your questions when you join us live! Be sure to register today.
